

RACE—THE POWER OF AN ILLUSION

Race is one topic where we all think we're experts. Yet ask 10 people to define race or name "the races," and you're likely to get 10 different answers. Few issues are characterized by more contradictory assumptions and myths, each voiced with absolute certainty. Let's clear away the biological underbrush and leave visible the underlying social, economic, and political conditions that disproportionately channel advantages to white people. Perhaps then we can shift the conversation from discussing diversity and respecting cultural difference to building a more just and equitable society!
